

Mathematics

GCSE

Head of Department : Mrs Williamson

Course Aims

The aims and objectives of the Pearson Edexcel Level 1/Level 2 GCSE (9–1) in Mathematics are to enable students to:

- develop fluent knowledge, skills and understanding of mathematical methods and concepts;
- acquire, select and apply mathematical techniques to solve problems;
- reason mathematically, make deductions and inferences, and draw conclusions;
- comprehend, interpret and communicate mathematical information in a variety of forms appropriate to the information and context.

Course Outline

The assessments will cover the following content headings:

1 Number

2 Algebra

3 Ratio, proportion and rates of change

4 Geometry and measures

5 Probability

6 Statistics

- The qualification consists of three equally-weighted written examination papers;
- Paper 1 is a non-calculator assessment and a calculator is allowed for Paper 2 and Paper 3;
- Each paper is 1 hour and 30 minutes long and has 80 marks;
- Some questions will be set in both mathematical and non-mathematical contexts;
- The qualification will be graded and certificated on a nine-grade scale from 9 to 1;
- Foundation tier: grades 1 to 5; Higher tier: grades 4 to 9.

Links to other subjects

Mathematics links with biology, physics, chemistry, computer science, economics, business studies, geography, history, psychology, art and design technology.

During the GCSE (9-1) Mathematics course, we study how mathematics is applied in real life situations to practical contexts.

Holcombe Habits

- Applying past knowledge is developed through application and practice.
- Persistence is developed through extended reasoning and problem solving contexts.
- Questioning and posing problems are developed through cognitive processes and thinker's key activities e.g. What if?

Mastery Endeavour Thinking

Skills needed to succeed in Mathematics

- critical thinking; problem solving; analytical thinking; quantitative reasoning; ability to manipulate ideas; construct logical arguments; communication; time management; teamwork; independence.

Transferable skills

Cognitive skills:

- non-routine problem solving; systems thinking; critical thinking; ICT literacy.

Interpersonal skills:

- communication; teamwork and collaborative problem solving.

Intrapersonal skills:

- adaptability; motivation and independence.

Mastery Endeavour Thinking

Career Pathways

Students can progress to:

- a range of different Advanced Level subjects, academic or vocational higher education qualifications; employment in a relevant sector; further training.
- many students go on to study honours degrees in physics, engineering, actuarial science, economics and mathematics.
- mathematics is recommended for computer science, accounting, chemistry, biology and life sciences, medicine, nursing, dentistry, business studies, management studies, finance, architecture, geology, psychology, surveying, philosophy and some advanced apprenticeships.

Mastery Endeavour Thinking

Top 10 Universities For Mathematics

- University of Oxford
- University of Cambridge
- University of St Andrews
- Durham University
- Imperial College London
- University of Warwick
- University of Edinburgh
- UCL (University College London)
- Lancaster University
- University of Bath
